

Next Generation Macrocycles

„The field has done well at producing technologies to serve as hit-identification platforms. But it would be nice to try to identify lead-quality matter: ligands that have a certain affinity for a target and that also have desirable pharmacokinetic attributes for cell permeability and oral bioavailability.“

Spiros Liras VP CV, MD Pfizer, from: Kotz, J. Bringing macrocycles full circle.
SciBX 2013, 5, doi:10.1038/scibx.2012.1176

AnalytiCon offers synthetic macrocyclic libraries from 8 chemotypes (MACROx).

- Entropically favoured
- Conformationally restricted yet flexible to adapt to binding site
- Excellent synthetic access (semi-synthetic compounds)
- Macrocyclic library compounds - ready to screen

Macrocyclic Compounds (MACROx) available off-the-shelf:

> 1500 Macrocyclic Semi-Synthetic Compounds from 8 Scaffolds

SD files available. Please ask for a quotation.
