Imidazo[1,2-a]pyrazines belong to the pyrazine heterocyclic family and have been gaining attention in drug discovery realm especially as structural analogues of purines. Derivatives of imidazo[1,2-a]pyrazines exhibit various pharmacological activities such as anticancer, antiviral, antimicrobial, anti-inflammatory activities. Recent research shows that the introduction of imidazo[1,2-a]pyrazine provides a good balance between metabolic stability and cellular potency. So far, Chemscene has developed many imidazo[1,2-a]pyrazine building blocks.
