The chemical structure shows a nucleoside derivative. The sugar moiety is a 2,3,5-trideoxy-2,3-dihydroxy-4-methyl-5-oxo-4,5-dihydro-1H-thiazole-4-yl group. This is linked via an ester bond to a 10-oxo-10H-phenanthro[9,9-b]pyridine-5-ylmethyl group. The phenanthro[9,9-b]pyridine system consists of a pyridine ring fused to a benzene ring, which is further fused to another benzene ring. The 10-position of the pyridine ring is a carbonyl group, and the 5-position of the first benzene ring is the point of attachment for the ester linkage.
