The chemical structure shows a palladium (Pd) center coordinated by a phosphine ligand (1,1'-bis(diphenylphosphino)ethane, dppe) and a sulfonamide ligand (4-sulfamoyl-2-naphthylamine). The dppe ligand is shown as two phenyl rings connected by a central carbon atom, with each ring having a phosphorus atom coordinated to the Pd. The sulfonamide ligand consists of a naphthalene ring system with an amino group (-NH-) and a sulfonamide group (-SO₂-NH₂) attached to it.
