

The popular biochemical markers of bone turnover. At AssaySolution, we provide highly sensitive ELISA kits for the precise quantitation of most of these biomarkers. Please visit our website at www.AssaySolution.com to see our full list of bone biomarker ELISA Kits and products. Image taken from Ferreira *et al.* (2015).

About us

AssaySolution provides reliable and high-quality reagents for immunological and functional assays for researchers globally in both academia and pharmaceutical/ biotech industry.

We proudly bring customers catalog reagents with competitive prices and also customized products and services to meet your specific needs. Our staff of well-educated and experienced scientists are highly-motivated to serve you in your ultimate success in all of your research and development endeavor.

Bone Biomarker ELISA Kits

Bone biomarkers are mainly produced from the bone remodeling process including, bone formation biomarkers, bone resorption biomarkers and regulators of bone turnover. Detections of bone metabolism have been studied with the biomarkers of enzymes, proteins and by-products during the bone remodeling process. Various biomarkers are now available for specific and sensitive assessment of the rate for bone formation and bone resorption.

Here at AssaySolution, we provide several reliable and high-quality bone formation, resorption, and turnover regulator biomarker ELISA Kits suited for your research purposes. Our aim is to equip scientists with high-quality ELISA kits that are specific for the exciting field of biomarkers. Our ELISA kits are individually optimized for the best results and quality assured before delivery.

Our ELISA Kits feature...

- Highly specific monoclonal antibodies
- Rapid procedures
- Small sample volume
- Variety of species

Featured Products*

| ELISA Kits | Assay Range | Cat No. |
|-----------------------------|-----------------|------------|
| Human Procollagen I Alpha I | 31.3-2000 pg/mL | AYQ-E10376 |
| Human Dkk-1 | 62.5-4000 pg/mL | AYQ-E10902 |
| Human Osteopontin | 62.5-4000 pg/mL | AYQ-E11161 |
| Human Osteocalcin | 31.3-2000 pg/mL | AYQ-E11200 |
| Human Osteoprotegerin | 62.5-4000 pg/mL | AYQ-E10925 |
| Human Sclerostin | 62.5-4000 pg/mL | AYQ-E10975 |
| Human RANKL | 78.1-5000 pg/mL | AYQ-E10898 |
| Human FGF-23 | 78.1-5000 pg/mL | AYQ-E11246 |
| Human Klotho | 78.1-5000 pg/mL | AYQ-E10922 |
