Chemicals

Version 20.2
24. January 2020, Burgdorf

Dear Customer

ReseaChem GmbH proudly presents its new **product catalog!**

It contains over 300 chemical **reference materials, fine chemicals** as well as **stable isotope-labeled compounds**. Within the last few months we added an exciting series of new compounds that brings your analytical, synthetic or biological research to the next level.

Additionally, we launched our new webshop: it will not only cover the list compounds but also show you immediately price information and availabilities as well as shipping costs. In order to keep you up to date, new launched products will be added subsequently and in an ongoing process.

For more information please visit <https://shop.reaseachem.ch>

If our product list does not include the substance you are looking for, we can offer you a **customer synthesis**. Please complete the „Custom Synthesis Request Form“ on the next pages and send it to info@reaseachem.ch. A confidential and quick reply is guaranteed.

We will make every possible effort to comply with your requests. When needing a **natural product ingredient** or a **chemical/pharmaceutical impurity** we are also able to isolate a needed compound in our fully equipped laboratory facilities—in accordance with your individual requirements! Please do not hesitate to get in contact with us.

About us

ReseaChem GmbH was founded in 1996 as a spin-off company of the University of Applied Sciences Berne located in Burgdorf, Switzerland.

ReseaChem offers a broad range of services in synthesis of stable labeled or unlabeled compounds for R&D purposes, isolation of natural products or degradation products as well as in supply of structure elucidation of unknown products. Unique is the offered 24-hour-NMR-service and, among this, analytical services such as LCMS- and GCMS-analytics, cannabinoid analysis and psychoactive drug screening are provided. Furthermore, ReseaChem offers a series of over 300 company-owned reference substances.

We are supplying the best solutions for our clients in the pharmaceutical, chemical and biotech industry. Besides analytics, synthesis and isolation services ReseaChem is the official distributor for **Applikon Biotechnology**, **Ovizio Imaging Systems** as well as **Cambridge Isotope Laboratories INC (CIL)** in Switzerland.

ReseaChem's strengths are the employees. They have a wide range of research experience in organic and analytical chemistry as well as biotechnology. ReseaChem understands the challenges customers face throughout their development and production process, recognizing that each customer has unique needs which can be satisfied with our decades of research experience.

ReseaChem offers you more than molecules!

Custom Synthesis

ReseaChem expands your chemistry capabilities offering complete solutions in custom synthesis of small organic molecules. We provide multistep synthesis from milligram up to gram scale in our state-of-the-art laboratories. Our rich experience in synthetic organic chemistry, including designing of synthetic pathways, literature research, protecting group chemistry and in-house analytics is your benefit.

All of our high quality products are delivered with a certificate of analysis. Our qualified chemists are pleased to assist you in your custom synthesis project.

Fill in the structure of the desired compound in the form below, and send your enquiry by Fax (+41 (0)34 424 03 12) or by E-Mail to info@reaseachem.ch. We will submit you a suitable offer!

Catalog products

Compounds from ReseaChem are delivered together with a lot-specific **certificate of analysis** which includes the identity and purity tests, release and expiry date, general information including the structural formula, molecular formula, molecular weight and CAS registry number as well as the recommended storage conditions. For detailed information on the analytical documentation delivered with each reference substance please contact us.

We offer **custom packaging!** Nearly all our products can be packed according to your specifications. Take advantage of our individual service and maximum flexibility.

Custom synthesis

ReseaChem provides multistep synthesis from milligram up to gram scale. We have rich experience in synthetic organic chemistry including designing of new synthetic pathway and literature research.

An excerpt of our expertise:

- Protecting groups
- Transition metal-catalyzed reactions
- Psychoactive drug standards
- DNA/RNA building blocks
- Pesticide metabolites
- 2H, 13C or 15N labelled reference compounds
- Plant ingredients
- Antioxidants
- Glucuronides
- Food contaminants

From isolation to identification and reference material preparation

ReseaChem offers isolation and purification with percentages up to reference material standard purity. Furthermore, isolated compounds can be analyzed and characterized by ReseaChem in order to make a structural elucidation. We provide a broad range of isolations from low milligrams up to grams by using techniques like preparative HPLC and MPLC in the field of:

- Plant ingredients, e.g. from rice, cannabis or tea
- Impurities, e.g. pharmaceutical decomposition products or synthetic byproducts
- Purification of complex organic mixtures

Analytical services

ReseaChem provides a broad range of analytical services such as a unique 24-hour-NMR-service for product quality control, compound purity and structure elucidation of small molecules. In addition, we provide strong expertise in the field of qualitative and quantitative psychoactive drug screening and quantification of cannabinoids in plant and food products. Our analytical service includes:

- NMR-analysis within 24h (1H, 13C, 13C-DEPT, 13C-APT, 11B, 19F and 31P)
- 2D-NMR spectroscopic investigations (e.g. COSY, HSQC, HMBC, NOESY)
- Quantitative analysis by NMR (1H, 19F & 31P)
- Mass spectroscopy investigations by GCMS and LCMS
- HPLC-UV qualifications and quantifications

Contract Research: More than molecules!

If no supporting literature for a specific compound is available, we will investigate methods of analysis, isolation, preparation and route optimization on a time/cost basis. We can also provide you with validations of our analytical methods if intended.

How to use this catalog

Our product catalog is set up in four sections:

1. Fine chemicals (page 7 to 17)

There you will find a lot of useful chemicals for your synthetic work, e.g. starting materials or building blocks and many more.

nitro olefines:	page 7 to 14
other fine chemicals:	page 14 to 17

2. DNA/RNA building blocks (page 17 to 21)

With this section we supply you with modified RNA/DNA building blocks.

3. Stable isotope-labeled compounds (page 21 to 25)

We can offer you a wide range of deuterated and other stable isotope-labeled compounds.

4. Reference materials (page 26 to 51)

This category covers primarily reference materials for forensic and environmental analyses. It also includes *metabolites* (for example pesticide metabolites or glucuronides such as ethyl- or THC-glucuronide), *psychoactive compounds* (for example amphetamines) or *plant ingredients* such as cannabinoids.

There are also deuterated analogs available, and those can be found in the third section of this catalog, the stable isotope-labeled compounds.

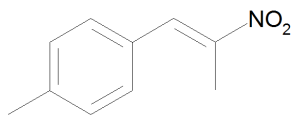

alkylresorcinols and metabolites:	page 26 to 28
food contaminants:	page 28 to 29
glucuronides:	page 29 to 30
pesticide metabolites:	page 30 to 37
plant ingredients and metabolites:	page 37 to 42
psychoactive compounds:	page 42 to 47
other reference chemicals:	page 47 to 51

If you are unable to find the substance you are looking for, please use the additional indices that we have included for your convenience:

Index I: lists the compounds by **chemical name** in an alphabetical order

Index II: contains a corresponding list of the **CAS registry numbers** for each compound

Index III: shows the compound list based on **molecular formula**
